www.davitl.com | <https://github.com/Lursmani>

Software Engineer with 5 years of experience specializing in front-end architecture (Next.js, React Native), combined with strong operational expertise in DevSecOps and release management, with a background in social sciences and research. Proven track record of executing massive code migrations, while independently owning the testing, deployment, and store release pipelines for production-critical web and mobile applications. Fully bilingual in English (C2) and Dutch (C1).

Technical Skills

Development Stack: JavaScript, TypeScript, React, React Native, Next.js, Figma, HTML, CSS, Tailwind, SASS, PostgreSQL/Prisma, NodeJs, Postman, Github Copilot, Claude Code.

Infrastructure & DevSecOps: Git, GitHub, CI/CD, Semgrep, Dependabot, Jenkins, Vercel, Sentry, Contentful, Cypress, Jest, Docker, Agile, Scrum.

Testing & Automation: Cypress, Jest, Sentry, automated linting workflows.

Methodologies: Agile, Scrum, Release Management

Languages: English (C2), Dutch (C1), Georgian (Native), Russian (B2).

Professional Experience

Software Engineer | Aurum Europe, Breukelen

03/2023 - Present

Technology stack: Next.js, React Native, React, TypeScript, Expo, Node.js, Tailwind, Sass, Cypress, Jest, Jenkins, CI/CD, Github Actions, Google Play Console, App Store, Modbus, M-Bus.

Development and deployment of the data-intensive EnergyFlip and EnergyGrip platforms for energy monitoring and IoT integrations. Managed the release lifecycle, engineering technical solutions based on user feedback, and evaluating implementation costs and trade-offs within a cross-functional team.

- **Core Architecture:** Migrated the legacy EnergyGrip web platform to the Next.js App Router, heavily optimizing long-term maintainability and system performance & Executed a rapid, end-to-end refactor of over 22,000 lines of code specifically for the React Native version of the EnergyFlip app in just four weeks through rigorous scoping.
- **IoT:** Implemented bidirectional API and hardware controls (Modbus/M-Bus) for real-time operation and incident response.
- **DevSecOps:** Built & maintained automated CI/CD pipelines for test and production environments to eliminate manual deployment bottlenecks; and secured the frontend by setting up Semgrep/Dependabot scans and rapidly resolving dependency vulnerabilities.
- **Release management:** Owned the end-to-end release management lifecycle for mobile applications across the Google Play Store and Apple App Store. In addition, engineered and automated the deployment architecture for white-labeled versions of the EnergyFlip React

Native platform.

- **Test Automation:** Enforced code quality by integrating automated unit and E2E testing (Jest, Cypress) and strict linting protocols directly into the build pipelines.
- **Process Engineering:** Designed and built a company-wide tracking system for a multi-thousand unit RMA recall, clearing a year-long backlog in three months to directly support ISO 9001 certification.
- **Functional Analysis:** Analyzed support desk feedback to proactively identify and resolve system bottlenecks and active bugs.
- **Design:** Co-designed and build the company-standard design system and component library.

Front-End Developer | Label A, Amsterdam

06/2022 - 03/2023

Technology stack: *Next.js, React, Redux, TypeScript, Node.js, Docker, SQLite, Postman, Gatsby, Strapi*

Development of scalable, custom web applications for enterprise clients including Nationale Nederlanden, DPD, and PON within a fast-paced agency environment. Responsible for bridging communication between clients and the development team to ensure smooth feedback loops and timely deliveries across multiple concurrent projects.

Front-End Developer | Universal Transit, Tbilisi

07/2021 - 05/2022

Technology stack: *Next.js, React, Redux, TypeScript*

Complete ownership of the front-end development for a scalable logistics dispatching platform. Responsible for translating complex logistical processes into an efficient user interface and ensuring seamless data flows between the client and the backend.

Junior Research Fellow | CRRC Georgia

01/2021 - 07/2021

- **Quantitative Data Analysis & Data Cleansing:** Cleaned and analyzed complex demographic datasets to identify key trends.
- **Interviewing & Data Collection:** Conducted structured telephone interviews and contact tracing for empirical data collection.
- **Reporting & Analytical Writing:** Co-authored research articles and technical reports, translating statistical findings into clear insights.

Education & Certifications

- **Meta Advanced React Certification**
- **FreeCodeCamp Front-End Libraries Certification**
- **International Relations, Bachelors:** International Black Sea University (Studied entirely in English)
- **Business Management Minor:** Amsterdam University of Applied Sciences
